PROFILE

Motivated and aspiring software developer, seeking a entry-level position to leverage my technical skills, problem-solving abilities, and strong work ethic. Eager to contribute to a dynamic team and drive innovation while continuously enhancing my knowledge and skills in this field.

PROJECTS

VIRTUAL VOICE ASSISTANT (Python)

Github : https://github.com/preranababar9/desktop-virtual-voice-assistant

- Developed a cutting-edge virtual Voice assistant using Python.
- Gained experience in using libraries for speech recognition, which allow the virtual assistant to understand and interpret user commands accurately.
- Used text-to-speech libraries to convert the assistant's responses into audio format.
- Supported tasks : Alarms, greetings, playing online and downloaded music, opening websites, information from wikipedia, time.

PORTFOLIO WEBSITE (Html, css, Javascript)

Live Demo : https://preranababar.netlify.app/
Github : https://github.com/preranababar9/personal-portfolio-website

- Builded and deployed my portfolio website using three powerful trio Html, CSS and Javascript, with smooth and responsive navigation througout the porfolio.
- Created detailed section about me, range of my projects with proper desciptions, skills and added seamless animation.
- Integrated social media profiles and contact form for visitors to connect with me on various platforms, expanding professional networks.

AMAZON CLONE (Html, css)

Live Demo : https://amazonclone-preranab.netlify.app/
Github : https://github.com/preranababar9/amazon-clone

- Implemened a clone of amazon.com e-commerce website using Html and css, highlighting that it aims to replicate the core features and user experience of the original website.
- Deisgned header (navigation bar) , main content section displaying various products in a grid or list format including there images, names and see more options and footer section with all the links.
